

Exhibit I: Marked-up Version of the Claim Changes

4. (Amended) A laminated material comprising cellulose sheets impregnated with a polymer resin that are mechanically pressed and cut into a [finished] product, wherein [that finished] the product includes a [top] surface with both a perimeter area having an edge contour and an interior region, wherein the perimeter area is relieved such that the edge contour is below the interior region.

6. (Amended) A laminated material according to claim 4, wherein the [top] surface is polygon shaped.

7. (Amended) A laminated material according to claim 4, wherein the [top] surface is rectangular.

8. (Amended) A laminated material according to claim 4, wherein the [top] surface is square.

9. (Amended) A laminated material according to claim 4, wherein the [top] surface is formed from a [top] cellulose sheet having a visual pattern that imitates another product.

10. (Amended) A laminated material according to claim 4, wherein the [top] surface is mechanically formed with a surface texture that varies in [accord] accordance with the visual pattern.

11. (Amended) A laminated material according to claim 4, wherein the [top] surface visually depicts wood.

12. (Amended) A laminated material according to claim 4, wherein the [top] surface visually depicts ceramic.

13. (Amended) A laminated material according to claim 4, wherein the [top] surface visually depicts stone.

14. (Amended) A laminated material according to claim 4, wherein the [finished] product is a board.

15. (Amended) A laminated material according to claim 4, wherein the [finished] product is a floorboard.

16. (Amended) A laminated material according to claim 4, wherein the [finished] product is a wall panel.

17. (Amended) A laminated material according to claim 4, wherein the [finished] product further includes sidewalls that extend down from said edge contours to a rim.

19. (Amended) A laminated material according to claim 18, wherein the rim mates with another laminated material [finished] product.

20. (Amended) A laminated material comprising cellulose sheets impregnated with a polymer resin that are pressed and cut to form a [finished] product, wherein [that finished] the product includes a [top] surface formed from a [top] cellulose sheet having a visual pattern that imitates another product, and wherein the [top] surface is mechanically formed to have a surface texture that varies in accord with the visual pattern.

21. (Amended) A laminated material according to claim 20, wherein the [top] surface is polygon shaped.

22. (Amended) A laminated material according to claim 21, wherein the [top] surface is rectangular.

23. (Amended) A laminated material according to claim 21, wherein the [top] surface is square.

24. (Amended) A laminated material according to claim 20, wherein the [top] surface visually depicts wood.

25. (Amended) A laminated material according to claim 20, wherein the [top] surface visually depicts ceramic.

26. (Amended) A laminated material according to claim 20, wherein the [top] surface visually depicts stone.

27. (Amended) A laminated material according to claim 20, wherein the [finished] product is a board.

28. (Amended) A laminated material according to claim 27, wherein the [finished] product is a floorboard.

29. (Amended) A laminated material according to claim 20, wherein the [finished] product is a wall panel.

30. (Amended) A laminated material according to claim 20, wherein the [finished] product further includes sidewalls that extend down from the [top] surface to a rim.

32. (Amended) A laminated material according to claim 30, wherein the rim mates with another laminated material [finished] product.

33. (Amended) A laminated material according to claim 20, wherein the [top] surface includes a perimeter area having an edge contour and an interior region, wherein the perimeter area is relieved such that the edge contour is below the interior region.

38. (Amended) A laminated material comprised of polymer impregnated sheets of which a [top] polymer-impregnated sheet includes a visual pattern, wherein [that top] the polymer-impregnated sheet is embossed in registration with the visual pattern.

45. (Amended) A laminated material according to claim 40, wherein the [top] surface includes a perimeter area having an edge contour and an interior region, wherein the perimeter area is relieved such that the edge contour is below the interior region.
